

VACANCY

Trainee Engineer

A rare and exciting opportunity has arisen for a Trainee Engineer to join our engineering department.

The successful candidate will undergo a fully proven and structured training program that educationally would take you to that of a Post Graduate Engineer. This program would be up to 7 years long, depending on your current level of education, so a high level of commitment and drive is essential. You will have a can do attitude, strong communication skills, with excellent time management.

Working within the lift manufacturing industry, previous exposure to metal fabrication would be desirable, but not essential. Under the supervision of a Senior Engineer, you will be required to process, modify where necessary, and issue CAD drawings, maintain bill of materials and other controlled documents, assist with the development and upkeep of product manuals, communicate technical updates and provide general support to the engineering team.

Starting date: as soon as possible

Full Job Description available upon request.

CV's to christina.ryan@wessexlifts.co.uk

CLOSING DATE: 1st February 2019

An Equal Opportunities Company
